

COMPLIMENTARY INITIAL VISIT PROCEDURE

The purpose of today's free initial consultation is to discuss your health concerns with our staff and make a determination as to whether or not your condition is one that may successfully be treated at our office. At this time, we can also answer questions as to whether your health insurance can be used to help cover the cost of care if necessary.

There is no charge for this initial consultation, and there is no obligation to purchase or pay for any services at this point.

If, however, after this initial consultation, you decide that you would like to receive care at this office, any procedures which would need to be performed including medical examinations, x-rays, testing and/ or treatment will be charged at our usual and customary fees. If medical insurance is available, we will be happy to bill your carrier directly for any covered services.

By my signature below, I understand and agree that when my initial consultation is over there will be a charge for any services I receive from that point forward.
